

## DSP118 DSP119

### 10W 2.75" Commercial Mini Satellite Speaker with Power Tap

#### Description

This product is a mini satellite wall-mounted speaker featuring a stylish design and quality sound. The DSP118 is an 8Ω low-impedance model, while the DSP119 is a 100V constant-voltage speaker with multiple power taps. Both models incorporate a 2.75" driver for high-quality audio and a universal joint for easy installation, allowing flexible wall mounting at various angles.

#### Features

- Type: Commercial PA system wall-mounted speaker.
- Rated power: 10W — available as 8 Ω (DSP118) or 100V constant voltage (DSP119).
- Power taps: DSP119 offers selectable power taps to suit different needs.
- Driver: 1 × 2.75" driver unit.
- Installation: Quick and easy mounting with a universal bracket.
- Design: Compact, neat appearance with exceptional sound quality.
- Applications: Ideal for public address systems in offices, hotels, bars, and shopping malls.
