

## MAG505S

### Touch Screen Volume Control

#### Description

The MAG505S Touch Screen Volume Control is a user-friendly zone control panel designed for professional multi-zone audio distribution systems. Featuring a minimalist design with tempered glass panels available in black or white finishes, it provides intuitive control for daily audio operation.

This wall controller enables users to adjust volume, select music sources, mute audio, and route local audio input directly into the public address system. It supports seamless integration with the audio matrix system and allows multiple control points across different zones.

#### Features

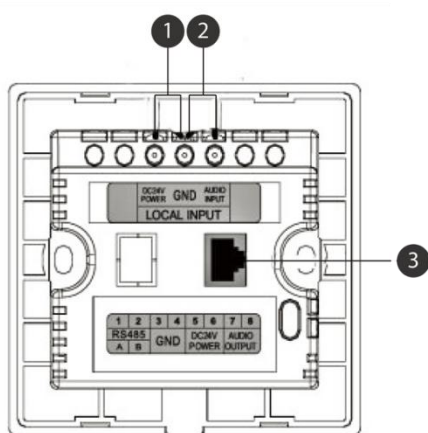

- Wall-mounted touch control panel for multi-zone PA system operation.
- Tempered glass front panel available in black or white finish.
- Intuitive control of volume, music source selection, and audio mute functions.
- Supports local audio input routing into the main PA system.
- Direct local audio connection via external input interface.
- Compatible with audio matrix system for centralized control.
- One matrix system supports up to 5 wall-mounted control panels.
- One control panel can be assigned per zone for distributed operation.
