

CM801

Compact 8-Channel Multi-Functional Mixing Console

Description

The CM801 is a compact 8-channel multi-functional mixing console designed as an essential tool for audio enthusiasts, offering precision control with 3-band EQ featuring mid-frequency sweep. Each channel is equipped with pad, HPF, mute, and PFL functions for detailed audio manipulation. The console includes 24-bit digital effects, Bluetooth connectivity, USB playback, and recording capability, making it well suited for live performances, studio recordings, and personal audio setups. A 7-segment stereo graphic equalizer further enhances its versatility, positioning the CM801 as a powerful and compact solution for a wide range of audio applications.

Features

- Compact 8-channel multi-functional mixing console.
- 3-band EQ with mid-frequency sweep.
- Each channel features Pad, HPF, Mute, and PFL functions.
- Built-in 24-bit 99-preset digital effects processor.
- Bluetooth connectivity.
- USB player function.
- MP3 recording capability.
- 7-segment stereo graphic equalizer.

Specifications

Model		CM801
Maximum microphone level input		+22dBu
Others input levels		+22dBu
Mixer TRS/XLR output level		+28dBu
Other output levels		+22dBu
Total harmonic distortion		<0.005%
SNR		-86dB
Channel line and court input		82 dB
Effects /Auxiliary output		80dB
Impedance	Mic Input	2.5KΩ
	Other Input	10kΩ or higher
	Other Output	120Ω
EQ	High Frequency	+15dB @12KHz
	Middle Sweep	+15dB @100Hz-8KHz
	Middle Frequency	+15dB
	Low Level	+15dB @80Hz
	High Pass Filter	18dB/octave,-3dB@100Hz
