MAG4040R

Audio Matrix Paging Station

Description

The MAG4040R is an audio matrix paging station designed for convenient paging and zone management in commercial audio systems. Featuring a 7-inch touchscreen, PoE connectivity, and network-based control, it provides intuitive access to paging functions, matrix scene switching, and zone volume and power control. With one-touch paging and audio ducking, it helps simplify daily operation while ensuring announcements are clearly delivered over background audio.

Features

- 7-Inch Touchscreen: Features a 7-inch touchscreen with a 1024 × 600 resolution for intuitive operation.
- PoE Power Supply: Supports Power over Ethernet (PoE) and network-based control for convenient installation and system integration.
- USB Playback: Supports audio playback from a USB flash drive.
- One-Touch Paging: Enables one-touch paging with audio ducking to reduce background music volume during announcements.
- Flexible Zone and Scene Control: Supports matrix scene switching, zone volume adjustment, and individual zone on/off control.
