MAG4040S

Digital Control Panel

Description

The MAG4040S is a digital control panel designed for convenient audio zone and scene management. Supporting PoE power supply and network-based control, it enables users to adjust zone volume, switch zones on or off, and select preset audio scenes through a centralized interface. Its screen lock function helps prevent accidental operation, making it suitable for commercial audio systems that require simple and efficient daily control.

Features

- PoE Power Supply: Supports Power over Ethernet (PoE) and network-based control for convenient installation and integration.
- Zone Volume Control: Enables individual zone volume adjustment.
- Zone On/Off Control: Supports independent zone on/off control for flexible audio management.
- Scene Switching: Allows quick switching between preset audio scenes.
- Screen Lock: Features a screen lock function to help prevent unintended operation.
