

MR6050

6.5-Inch Marine Speaker with RGB LED Lighting

Description

MR6050 is a 6.5-inch marine speaker designed to deliver clear, balanced sound for yachts, boats, and other marine environments. Featuring a 6.5-inch PP cone woofer and 1-inch aluminum dome tweeter, it provides reliable full-range audio with a rated power of 50 W. The built-in RGB LED lighting supports multiple colors, adding a stylish visual effect to marine audio installations. Its compact design and easy mounting make it suitable for a variety of onboard entertainment applications.

Features

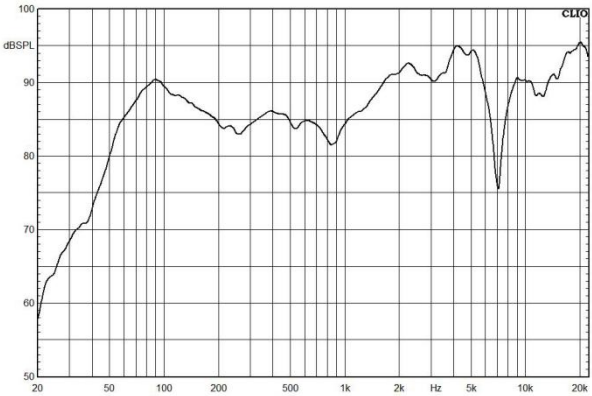

- 6.5-inch two-way marine speaker for clear and balanced sound.
- 50 W rated power with 4Ω impedance for reliable audio performance.
- PP cone woofer and aluminum dome tweeter for detailed sound reproduction.
- RGB LED lighting with multiple color options for a stylish visual effect.
- Compact and easy-to-install design for yachts, boats, and marine entertainment spaces.
