

D6563

150W Professional Two-Way Speaker

Description

This conference loudspeaker is a versatile audio device featuring a phase-inverted design for enhanced low-frequency performance. It offers an elegant appearance and straightforward installation, making it suitable for a variety of meeting and event settings.

Features

- Phase-inverted bass-reflex two-way loudspeaker system.
- Enclosure finished with black speckled water-based paint; acoustic damping material applied to the rear surface of the metal grille.
- Top-mounted suspension points (three) enable vertical hanging installation using lifting rings and rope accessories in conjunction with the rear rigging points.
- Rear and side panels each feature two suspension points, suitable for wall mounting using the D3A bracket.
- Bottom slot accommodates D5A wall-mount bracket or D6A floor-standing tripod installation.
