

D6565

12-Inch Professional Two-Way Full Range Speaker

Description

The D6565 is a professional two-way loudspeaker. Featuring a 12-inch bass driver and a 1-inch treble driver, it delivers clear and sonorous sound reproduction. Designed with a wide frequency response of 55Hz to 18kHz, the system offers high build quality and long-term durability, maintaining structural integrity over extended use. It is an ideal choice for karaoke rooms, live performances, conference events, shopping malls, and other small-scale high-fidelity sound reinforcement applications.

Features

- Phase-inverted bass-reflex two-way loudspeaker system.
- Wooden enclosure with black textured paint finish; metal grille backed with acoustic damping material.
- High-efficiency, high-quality transducers; supplied with mounting bracket for wall installation.
