

D6566A

Dual 15-Inch Professional Two-Way Full Range Speaker

Description

The D6566A is a professional two-way loudspeaker. Featuring a 15-inch bass driver and a 1.75-inch treble driver, it delivers clear and sonorous sound reproduction. Designed with a wide frequency response of 55Hz to 20kHz, the system offers high build quality and long-term durability, maintaining structural integrity over extended use. It is an ideal choice for karaoke rooms, live performances, conference events, shopping malls, and other small-scale high-fidelity sound reinforcement applications.

Features

- Dual 15-inch high-power, long-excursion bass transducers deliver robust and powerful low-frequency output.
- Phase-inverted bass-reflex two-way full-range loudspeaker system.
- Built-in high-efficiency, high-quality transducers; suitable for suspension installation.
- Wooden enclosure finished with black speckled water-based paint; perforated metal grille backed with acoustic damping material.

Specifications

Model	D6566A
Unit	15"×2, 1.75 "×1
Frequency Range(±3dB)	55 Hz -20,000Hz
Sensitivity (1m, 1W)	100dB±2dB
Max SPL	129dB±2dB
Input Impedance	4Ω
Rated Power	800W
Recommended power amplifier	1000W, 4Ω
Directivity (H×V)	90°×40°
Dimension(H×W×Dmm)	1100×440×450mm
Weight	51kg
