

D6596

15-Inch Professional Full-Range Loudspeaker

Description

This product is a professional phase-inverted two-way full-range loudspeaker featuring a 15-inch woofer and a 3-inch tweeter, delivering clear and sonorous sound reproduction. Designed with a wide frequency response of 58Hz to 19kHz, the system offers high build quality and ensures long-term durability.

Features

- Phase-inverted low-frequency radiated two-way full-range system.
- The surface of the wooden box is sprayed with large black speckled and water-based paint, and the back of the perforated metal mesh is pasted with acoustic sound-penetrating cotton.
- With high-efficient and high-quality unit units, it can be ceiling-suspended or wall-mounted.
