

D7733

500W All-Weather Passive Line Array Full-Range Loudspeaker

Description

The D7733 is an all-weather passive line array full-range loudspeaker featuring a three-way configuration comprising dual 10-inch low-frequency drivers, one 3.5-inch mid-frequency driver, and one 1.75-inch high-frequency driver. It delivers natural, high-fidelity sound reproduction with strong projection and exceptional clarity. Engineered with a rugged enclosure and IP66-rated all-weather construction, the system ensures reliable performance across a wide range of indoor and outdoor applications.

Features

- Enclosure molded from polymer composite materials, featuring a five-layer waterproof and dustproof grille.
- Three-way configuration delivers clear, detailed sonic reproduction with exceptional projection.
- All-weather design compliant with IP66 protection rating.
- Three-point suspension mounting system for straightforward and secure installation.

Specifications

Model	D7733
System Configuration	2×10" LF, 1×3.5" MF, 1×1.75" HF
Frequency Response (±3dB)	70Hz-18,000Hz
Sensitivity	101±2dB
MAX. SPL.	128±2dB
Input Impedance	8Ω
Rated Power	500W
Directivity (H)	90°
Dimensions (H×W×D)	306×671×458mm
Weight	23kg
