

## D7735

### Weather-Resistant 600W Passive Line Array Subwoofer

#### Description

The D7735 is an all-weather passive line array subwoofer featuring dual 12-inch low-frequency drivers, delivering deep and impactful bass response with high fidelity and excellent transient impact. Engineered with a rugged enclosure and IP66-rated all-weather construction, the system ensures reliable performance in both indoor and outdoor applications. Equipped with a three-point suspension system, it allows flexible and secure installation for a variety of professional sound reinforcement setups.

#### Features

- Enclosure molded from polymer composite materials, featuring a five-layer waterproof and dustproof grille.
- All-weather design compliant with IP66 protection rating.
- Three-point suspension mounting system for straightforward and secure installation.

#### Specifications

| Model                     | D7735         |
|---------------------------|---------------|
| System Configuration      | 2×12" LF      |
| Frequency Response (±3dB) | 50 Hz -300Hz  |
| Sensitivity               | 98±2dB        |
| MAX. SPL.                 | 126±2dB       |
| Input Impedance           | 8Ω            |
| Rated Power               | 600W          |
| Dimensions (H×W×D)        | 374×756×550mm |
| Weight                    | 33kg          |
