

LA1428S 800W 18-Inch Professional Subwoofer

Description

The LA1428S is an 800W professional subwoofer distinguished by its high reliability and performance. Constructed from marine-grade plywood and equipped with a powerful 18-inch bass driver, it delivers rich low-frequency extension and features a durable, all-weather enclosure, making it well suited for a wide range of audio configurations.

Features

- The enclosure is constructed from marine-grade plywood, ensuring high reliability and structural integrity; all metal hardware is fabricated from high-quality aluminum alloy.
- Equipped with a long-excursion woofer engineered to deliver powerful and impactful bass response.
- All-weather design, optimized for mobile and portable applications.
