

## PK218S

### 1200W Professional Passive Subwoofer

#### Description

The PK218S is a high-performance subwoofer engineered to complement line-array systems, delivering deep and impactful bass response spanning 35Hz to 300Hz. Equipped with dual 18-inch long-excursion woofers, the system provides a rated power of 1200W and achieves a maximum SPL of 131dB, ensuring fast, dynamic low-frequency reproduction with excellent impact and clarity. Its rugged enclosure and user-friendly design make it well suited for auditoriums, conference halls, high-end KTV rooms, bars, and other venues requiring extended low-frequency coverage.

#### Features

- Features dual high-power 18-inch long-excursion woofers, delivering fast, deep, and impactful low-frequency performance with excellent punch and transient response.
- Enclosure constructed from professional-grade high-density plywood and finished with a durable polyurea coating, making it well suited for low-frequency reinforcement in entertainment venues including high-end KTV rooms and bars.

#### Specifications

| Model                     | PK218S         |
|---------------------------|----------------|
| System Configuration      | 2×18" LF       |
| Frequency Response (±3dB) | 35Hz–300Hz     |
| Sensitivity               | 100±2dB        |
| MAX. SPL                  | 131±2dB        |
| Input Impedance           | 4Ω             |
| Rated Power               | 1200W          |
| Dimensions (H×W×D)        | 560×1068×786mm |
| Weight                    | 80.8kg         |
